

WITS Changes – 17.0.0 Release (Mental Health)

9/16/2014

In the 17.0.0 Release 6 bugs were repaired in WITS. Below are a summary of the errors and the resolutions of the problems.

- 1) Consented Activity List: Yellow screen occurs when reviewing a consented Admission record.
Resolution: A yellow screen will no longer occur when reviewing a consented Admission record.
- 2) TX Plan: The Discharge criteria field from Goals not being brought forward into an inactive draft or new version of the base Tx Plan. **Resolution:** The Discharge Criteria field from Goals will now be brought forward when creating an inactive draft or a new version of the base Tx Plan.
- 3) Encounter Note (Beta UI): Generating Report from Notes split words on different lines. **Resolution:** Text for Notes on Encounters will now wrap correctly to the next line when viewing the report created by clicking on Generating Report.
- 4) Billing Reports & Screens - Various (Beta UI): Multiple formatting issues **Resolution:** The display and sorting of the Claims Reconciliation report and the Vouched Services by Agency report has been corrected. There has also been additional spacing adding between the text and data fields on the Client Cap Profile screen.
- 5) System Access: The role description and functionality for the "Human Resources (Full Access)" role attribute is not accurate **Resolution:** The Staff List in the left menu has been enabled for the "Human Resources (Full Access)" and "Human Resources (Read-Only)" roles.
- 6) Claim Item List: The horizontal scroll bar appears in minimum resolution. **Resolution:** The Program Name search box has been moved under the FFS Type search box to reduce horizontal scrolling when at a resolution of 1280x1024.

Below you will find a summary of the change to WITS for the 17.0.0 release (which took place September 22, 2014). When these changes are made in Idaho-Mountain and Idaho-Pacific, the top left portion of your screen will say 17.0.0.

User Interface

In the 17.0.0 release, the WITS Beta and WITS Prime user interfaces are merged. Users will now be taken to the new user interface regardless of if they go to the WITS Beta or WITS Prime URLs.
